BEST INSULATION FOR CRAWL SPACES

BATT INSULATION – DO NOT USE

- Not for below-grade use.
- A nesting material for rodents.
- It will absorb moisture and fall from the ceiling cavities.

FOAM BOARD – A GOOD OPTION

- Not ideal for walls with variations.
- The edges must be sealed.
- Cannot wrap floor joists.

CLOSED CELL SPRAY FOAM – BEST

- Can contour any wall imperfection.
- Offers a seamless, airtight seal.
- Can wrap floor joists in insulation.
