

# at a glance

## BEST INSULATION FOR YOUR WALLS

### EXTERIOR WALLS VERSUS INTERIOR WALLS

- Exterior walls: part of the thermal envelope.
- Interior walls: **not** part of the thermal envelope.
  - Thermal envelope needs better performance.

### FIBERGLASS BATT

- Best for interior walls.
- Excellent at sound dampening.
- Not the highest performing.

### DENSE PACK CELLULOSE

- Works for interior and exterior walls.
- Better performance than batt.
- Messy installation.

### HYBRID SYSTEM

- Ideal for exterior walls during renovation.
- Combines spray foam and batt.
  - Lower cost than spray foam.
  - Better performance than batt.

### CLOSED CELL SPRAY FOAM

- Best for below-grade walls.
- Priciest option but best performance.

### OPEN CELL SPRAY FOAM

- Great for above-grade walls.
- Excellent performance, more affordable than closed cell.
