

at a glance

DOES A CRAWL SPACE NEED TO BREATHE?

TRADITIONALLY INSULATED CRAWL SPACES DO NEED VENTILATION.

You cannot cover up or block these vents to improve your crawl space environment.

CRAWL SPACE AIR CAN BE CONDITIONED WITHOUT VENTILATION.

An encapsulated crawl space does not allow air to exchange through vents. This makes a space ideal for conditioning.

SPRAY FOAM'S ADVERTISED R-VALUE IS ITS AGED R-VALUE.

An encapsulated crawl space is no longer "breathing," but the air is cleaner and better controlled.

- Use a dehumidifier.
- Tap into existing HVAC in the crawl space.
