DOES SPRAY FOAM INSULATION DETERIORATE?

UV RAYS BREAK DOWN SPRAY FOAM OVER TIME.

- Spray foam should be covered.
 - Coating
 - Drywall
- If exposed to sunlight, spray foam will yellow.
 - Yellow is a sign of deterioration

WITHOUT UV EXPOSURE, SPRAY FOAM SHOULD LAST MANY DECADES.

- Spray foam is a plastic polyurethane foam.
- Created via a chemical reaction.

SPRAY FOAM PERFORMANCE IS CONSISTENT.

- R-value decreases negligibly over time.
- Spray foam stays adhered in place.
- No gaps, cracks, or sagging.
