DOES SPRAY FOAM SAVE MONEY?

YES, IT SAVES MONEY OVER TIME.

Spray foam insulation saves you money over time. Despite a large upfront investment cost, spray foam offers:

- **Lower energy bills** over the lifetime of the insulation [and spray foam is expected to last as long as your building will].
- Support for existing HVAC systems, so they don't have to run as hard.
- Enough efficiency that **you can downsize to a smaller HVAC system** that costs less to run.
