at a glance

FIBERGLASS BATTS vs. BLOWN-IN FIBERGLASS

COST

- Batt insulation is slightly more affordable than blown-in.

INSTALLATION METHOD

- Both insulations can be installed as a DIY. Blown-in requires a machine rental.

PERFORMANCE

- Blown-in offers better performance than batt, because it can conform to unique cavities.

LONGEVITY

- Both insulations have an expiration date. Batt usually needs replaced, while blown-in needs topped off after settling.
