FLASH AND BATT: PROS & CONS

Traditional flash and batt combines 1 inch of closed cell spray foam with a batt of insulation.

PROS OF FLASH AND BATT

- More budget-friendly than spray foam insulation alone
- Better sound control than closed cell spray foam alone
- Offers an air barrier that fiberglass cannot deliver on its own
- Higher R-value than just fiberglass

CONS OF FLASH AND BATT

- Traditional flash and batt risks condensation problems
- Flash and batt can have gaps
- Flash and batt is tricky to install
