HOW CAN I FIX MY CRAWL SPACE?

A BETTER CRAWL SPACE WOULD...

- Have better smelling air
- Be a cleaner environment
- Offer more accessibility
- Have fewer pest infestations
- Be worry free

CRAWL SPACE ENCAPSULATION OFFERS ALL THESE BENEFITS.

Encapsulation cuts off the crawl space from the outside environment. Then, the air can be conditioned.

With thick plastic sheathing on the floor, the crawl space is clean and dry. It is hard for pests to invade, and requires only minimal maintenance.
