HOW TO GET RID OF MUSTY SMELLS IN A CRAWL SPACE

At best, the musty smell is due to the circulation of dirty air. At worst, that dirty air also contains active mold spores from excess humidity.

3 STEPS YOU MUST TAKE

You must complete all three of these steps. Otherwise, the odor will inevitably return.

- Treat any existing mold or mildew
- Condition the crawl space air
- Stop air infiltration in the crawl space

We recommend encapsulation to stop air infiltration in the crawl space and condition the air.
