

at a glance

IS BLOWN-IN INSULATION CHEAPER THAN BATTS?

BOTH BATT AND BLOWN-IN CAN BE BUDGET-FRIENDLY.

- Fiberglass batt: affordable.
- Rockwool batt: more expensive.
- Blown-in insulations: affordable.

GENERALLY, BATT IS LESS EXPENSIVE THAN BLOWN-IN INSULATION.

- Our rates:
 - Batt: \$0.75 – \$3.00 per square foot
 - Blown-in: \$1.50 – \$4.00 per square foot

BOTH ARE AFFORDABLE: CHOOSE BASED ON PERFORMANCE NEEDS.

- Attic insulation? Blown-in with an air-seal is best.
- Other areas of the home? Batt is one of few affordable options.
- Want the best performance? Get spray foam insulation, which is more expensive.
