## IS SPRAY FOAM INSULATION PEST-PROOF?

### **NO INSULATION IS PEST-PROOF.**

No insulation material is 100% pest-proof. However, **it can play a role in pest control.**

Some insulation products are ideal nesting material for rodents.

Spray foam is not a nesting material. With its airtight seal, spray foam can cut off avenues and pathways of insects and other critters.

Spray foam is not pest-proof, but it can contribute to a pest control strategy.
