IS THERE A DOWNSIDE TO SPRAY FOAM INSULATION?

POTENTIAL DOWNSIDES

There are three reasons why people might not think spray foam is worth it.

COST

Spray foam insulation is pricier than most other insulations. Not everyone can afford to invest in spray foam.

ROI TURNAROUND

Spray foam does pay for itself over time, but not quickly. It could take at least 5 years to break even.

INSTALLATION REQUIREMENTS

Spray foam should only be installed by a professional. It is not DIY-friendly.
