## WHAT KIND OF INSULATION DO YOU USE IN A CRAWL SPACE?

Crawl spaces need insulation. Your crawl space is part of your thermal envelope.

You can either insulate the crawl space ceiling **or** the walls.

### **FIBERGLASS BATTS**

- Popularly installed in ceilings
- Not suitable for crawl spaces

### **RIGID FOAM BOARD**

- A good option for flat walls
- DIY-friendly

### **CLOSED CELL SPRAY FOAM**

- Works for ceilings and walls
- Appropriate for walls with variations
- Not for DIY application
