

# *at a glance*

## WHY IS MY HOUSE SO HOT IN THE SUMMERTIME?

### **POSSIBLE PROBLEMS**

- Poor air circulation
- Air leakage
- Poor humidity control
- Problematic windows
- Poorly sized HVAC system
- Ineffective attic insulation

### **WHO TO CONTACT**

Contact an HVAC specialist or insulation contractor for a consultation about your relevant home systems.

You can also contact a window specialist to update single-pane windows.
