WHY REMOVE EXISTING INSULATION WHEN INSULATING YOUR ATTIC

EXISTING ATTIC INSULATION CAN BE DIRTY OR HOME TO PESTS.

- Leaving existing insulation can risk health hazards (rodent droppings or nests).

EXISTING ATTIC INSULATION MAY NOT BE INSTALLED PROPERLY.

- The fact that you're investing in new insulation indicates that your current insulation isn't working.

EXISTING ATTIC INSULATION BLOCKS AIR-SEALING MEASURES.

- Budget insulation + air-sealing is the best performance available for lower cost.

EXISTING ATTIC INSULATION PREVENTS SPRAY FOAM FROM ADHERING.

- Spray foam adheres and expands.
 - Sticks like glue and seals any leaks in the attic floor.
 - Delivers a high R-value to help combat conductive heat transfer.
