## 5 REASONS WHY YOUR ENERGY BILLS MAY BE HIGH

### 1. INEFFICIENT APPLIANCES

- Consider upgrading to ENERGY STAR® certified appliances to use less energy.

### 2. USING PEAK POWER

- Verify you aren't being charged on a time-of-use (TOU) plan. Limit your power usage during peak hours.

### 3. INEFFICIENT HVAC SYSTEM

- Contact a qualified HVAC contractor. Consider investing in a smart thermostat.

### 4. LEAVING THINGS PLUGGED IN

- Unplug and turn off electronics when not in use to save power.

### 5. LACK OF INSULATION

- Consider a home energy audit. Consult with a qualified insulation contractor.
